

Information on NCI's Implementation of the NIH Genomic Data Sharing Policy

WWW.CANCER.GOV/GDS

What is the data sharing process?

The NIH Genomic Data Sharing (GDS) Policy* was issued to:

1

Promote broad and robust sharing of human and non-human data from a wide range of genomic research.

2

Ensure appropriate protections for research involving human data and oversight of research conduct, data quality, data management, data sharing, and data use.

*See the NIH Genomic Data Sharing Policy at <https://gds.nih.gov/>.

In order to help investigators better understand the GDS Policy and move through the process, NCI offers a comprehensive online guide at WWW.CANCER.GOV/GDS which includes the following items:

KEY DOCUMENTS

Institutional
certification
templates

Data sharing plan
templates

Basic Study
Information form
